

variable.name	label		format	source	filename
fips	Federal Information Processing Standard (FIPS) code, unique county identifier				
county	County name		numeric (integer)	Mississippi Secretary of State, voter history file	ms_counts by county_final.RData
joint	Covariate profile (joint distribution of voter file covariates)		factor with 19 levels	Mississippi Secretary of State, voter history file	ms_counts by county_final.RData
n-pop	Number of Mississippi G11 voters with given profile (joint distribution cell size)		factor with 6,535 levels	Mississippi Secretary of State, voter history file	ms_counts by county_final.RData
COUNTY	County name		numeric (integer)	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
YES-TOT	'Yes' vote count on Ballot Measure 26		factor with 82 levels	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
NO-TOT	'No' vote count on Ballot Measure 26		numeric (integer)	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
REP-TOT	Vote count for the Republican gubernatorial candidate		numeric (integer)	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
DEM-TOT	Vote count for the Democratic gubernatorial candidate		numeric (integer)	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
FLAG	Flag for inconsistencies between statewide official results and county recapitulation reports		factor with 3 levels	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
yes26	Fraction voting 'yes' on Ballot Measure 26		numeric [0,1]	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
no26	Fraction voting 'no' on Ballot Measure 26		numeric [0,1]	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
repgov	Fraction voting for the Republican gubernatorial candidate		numeric [0,1]	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
size	Total votes cast on Ballot Measure 26		numeric (integer)	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
insample	Indicator for inclusion in the study		numeric (integer)	Mississippi Secretary of State, official 2011 General Election results	ms-g11-county-vote-data.RData
condition	Experimental condition		factor with 15 levels	Original survey data collected by the authors	ms_replication.data.RData
qd	Direct question		factor with 5 levels	Original survey data collected by the authors	ms_replication.data.RData
q2a	List control condition		factor with 7 levels	Original survey data collected by the authors	ms_replication.data.RData
q2b	List treatment condition		factor with 7 levels	Original survey data collected by the authors	ms_replication.data.RData
q1a	Endorsement control condition (Phil Bryant)		factor with 6 levels	Original survey data collected by the authors	ms_replication.data.RData
q1b	Endorsement treatment condition (Phil Bryant)		factor with 6 levels	Original survey data collected by the authors	ms_replication.data.RData
q1	Randomized response turnout practice question		factor with 3 levels	Original survey data collected by the authors	ms_replication.data.RData
q2	Randomized response coin flip on practice question		factor with 3 levels	Original survey data collected by the authors	ms_replication.data.RData
q3	Randomized response question		factor with 3 levels	Original survey data collected by the authors	ms_replication.data.RData
county	County name		factor with 19 levels	Original survey data collected by the authors	ms_replication.data.RData
precinct_recode	Precinct code		factor with 389 levels	Original survey data collected by the authors	ms_replication.data.RData
sex	Age category (from voter file)		factor with 5 levels	Original survey data collected by the authors	ms_replication.data.RData
party	Gender (from voter file)		factor with 3 levels	Original survey data collected by the authors	ms_replication.data.RData
qage	Party ID (from voter file)		factor with 3 levels	Original survey data collected by the authors	ms_replication.data.RData
qsex	Age (survey question)		numeric (integer)	Original survey data collected by the authors	ms_replication.data.RData
qp1d	Gender (survey question)		factor with 2 levels	Original survey data collected by the authors	ms_replication.data.RData
qp1d	Party ID (survey question)		factor with 6 levels	Original survey data collected by the authors	ms_replication.data.RData
qpeducation	Education level (survey question)		factor with 16 levels	Original survey data collected by the authors	ms_replication.data.RData
